Summary

I'm a Junior Full Stack Developer experienced in building web applications with React, Node.js, and MongoDB. Skilled in creating responsive UIs, integrating RESTful APIs, and working with both component-based and feature-based architecture. Developed backend features (e.g. password reset, Swagger docs) and frontend pages with modals and animations. Comfortable with Git, SCRUM (Trello), and deploying via Vercel and Render. I bring curiosity, strong attention to detail, and a collaborative mindset to every project.

Hard skills

HTML5/CSS3, JavaScript, React, Redux, Node.js, Express, MongoDB, Swagger (OpenAPI), Git, GitHub, Vite, Tailwind, Figma, Responsive/Adaptive design, Email Marketing (Brevo), Image and Video Management (Cloudinary), Postman. Basic knowledge of TypeScript, MySQL, Bootstrap, PHP, WordPress.

Work Experience

MVK Mash LLC – Freelance (Ukraine) | Front-end developer

07/2025-09/2025

<https://smart-hubmvk.com/>

• Led the development of a responsive business platform for SmartHub MVK, building key modules and order forms with KeyCRM integration and Zod validation. Upon client request, migrated the project to **Builder.io** to enable easy content management, provided user instructions, and created reusable templates for future targeted ad campaigns. Ensured semantic HTML, SEO optimization, accessibility, and high performance (PageSpeed Insights), with deployment via FTP and direct collaboration with the client. **Technologies & Tools:** React, JS, TypeScript, Vite, Tailwind CSS, GitHub, React Hook Form + Zod, Builder.io.

PetsHelp Marketplace Initiative (Ukraine) | Front-end developer

04/2025-Present

• Developed user authentication and service booking forms, enhancing the user experience and driving conversions. • Conducted code reviews, focusing on semantic structure, accessibility improvements, code cleanliness, and adherence to the DRY principle. • Led the frontend team, collaborating with design and backend teams for seamless product development. **Achievements:** Recognized for leadership and contributions to product quality.

Technologies & Tools: React, JS, TypeScript, Vite, Tailwind CSS, GitHub, React Router DOM, React Redux + Redux Toolkit, React Hook Form + Zod.

Project Experience

Aqua Track (<https://project-rapid-forge-frontend.vercel.app/>)

2025

<https://github.com/yuliia-shl/Aqua-Track-frontend>

<https://github.com/yuliia-shl/Aqua-Track-backend> (<https://aqua-track-app.onrender.com/api-docs/>)

A personal water tracker that helps users stay hydrated (responsive design).

• Team project (14 days). As a developer, worked on both backend and frontend. Implemented the water/month endpoint, password reset functionality, and enhanced Swagger documentation for the water API. On the frontend, developed authentication pages (SignIn/SignUp), modal windows, adjusted styles, and integrated ReactConfetti. Also reviewed and checked Pull requests for quality and consistency. Task planning in Trello, utilized SCRUM methodology. Tech stack: React, CSS/Saas, JavaScript, Node.js, Vite, Swagger (OpenAPI), MongoDB, Email Marketing (Brevo), Image and Video Management (Cloudinary). Build at Vercel (frontend) and Render (backend).

Portfolio (<https://github.com/yuliia-shl/jefferson-portfolio/>) <https://yuliia-shl.github.io/jefferson-portfolio/>

2024

A developer portfolio landing page with a responsive layout and White/Dark theme.

• Team project (7 days). As Team Lead and Developer of the Footer section, also contributed to the Reviews section (using Swiper API) and assisted with other tasks. Supervised the project on GitHub, ensured build stability, and optimized page performance. Task planning in Trello, utilized SCRUM methodology. Tech stack: HTML, CSS/Saas, JavaScript, Vite. Build at Vercel.

Watchcharm (yuliia-shl.github.io/watchcharm/) <https://github.com/yuliia-shl/watchcharm/>

2024

A watch landing page with a responsive layout.

• Team project (7 days). As an Assistant Team Lead and Developer of the Sale section, built the project using a pre-configured Vite setup, assisted developers with their tasks, and reviewed/merged pull requests. Task planning in Trello, utilized SCRUM methodology. Tech stack: HTML, CSS, Vite. Build at GitHub Pages.

Courses

GoIT (IT school) – Full-stack developer, 2024 - 2025
